Index to Volume 78

Subject Index

A tale of gloom and despair dispelled, (284), 12
A-level biology practicals: some hints, (283), 111
acetylsalicylic acid, (285), 45
Advanced GNVQ Science: our first cohort, (284), 41
Afternoon of the 'Egg Tricks', (284), 126
Air pressure experiments, (282), 121; (283), 125
aldehydes, (282), 120
Alien alleles, (284), 108
alleles, (284), 108
alum, (284), 57
anhydrobiosis, (282), 61
animal behaviour, (284), 15; (285), 39
Apparatus for measuring the rate of evolution of gas from a reaction, (283), 120
application of electronics, (282), 49
assessment, (283), 79; (284), 99
atmospheric pressure, Helping children to understand, (282), 79
attitudes of students, (285), 67
attitudes to teaching, (282), 109
Average wavelength of white light, (284), 122

background knowledge of one A-level chemistry class, a survey of, (282), 39
balancing equations, (285), 103
biology practical, (283), 111
blue dye challenge, The, (282), 73
bonding, (285), 11, 85
burning (285), 31

camera, (282), 85
catalase, (285), 97
chemistry, A-level, (282), 39; (285), 45
conceptions: bonding, (285), 11
  earth science, (283) 91
  electric current, (284), 89
  ionic bonding (285), 85
  ozone layer, (283), 57
  thermal conduction, (282), 33
Children's ideas about the ozone layer and opportunities for physics teaching, (283), 57
circulation system, (285), 100
cocktail of delights for OFSTED, (285), 23
combustion, (284), 116
complex balance?, A, (285), 103
Computer modelling of biological molecules, (282), 55; (283), 9
conceptions of science, (285), 79
conductivity electrode, A simple, (284), 118
Coordination chemistry – analysis using conductance measurements, (285), 113
copper extraction, (282), 67
Correlational studies in school science: breaking the science-experiment-certainty connection, (282), 95
Count Dracula's key – a magic motivator for middle school biology, (282), 63

damping, (282), 87
density, (282), 92; (284), 126
Differences, energy and change: a simple approach through pictures, (283), 13
differentiation, (284), 95; (285), 23
diffraction grating, (284), 122
DNA, (282), 70; (283), 114
DNA makes RNA makes protein, (283), 103
Do gradients have units?, (282), 119; (283), 125
Doctor Watson's weird machine – conducting frictional electricity, (282), 81
dyes, (282), 73

early atmosphere, (285), 106
Earth in space, (285), 119
earth science, (283), 91
Editorial – Thirty Years On, (282), 7
Educating the 'New Pasteur', (283), 63
elbow joint, simulated, (285), 123
electric current, (284), 89
electrical conduction, (282), 81
electrode, (284), 118
electron transfer, (284), 112
electronic structure at A-level, An alternative approach to the introduction of, (283), 117
electroscope, (285), 115
energy and change, (283), 13
environmental science, (284), 49
enzyme activity, (285), 97
esters, (284), 120
Experiment for studying the kinetics of a combustion reaction, (284), 116
Experimental and investigative science Key Stage 1. Not just one way to do it!, (282), 17

floating cones, (282), 92
floating and sinking, (284), 126
fluid flow, (283), 121
forces in the curriculum, (283), 127
Four investigations of animal behaviour, (285), 39
Foxes and rabbits – and a spreadsheet, (283), 21
From animal behaviour to DNA and back again: in praise of molecular biology, (284), 15
From polystyrene balls and bamboo skewers, (282), 70
fun, (285), 15

game, circulation, (285), 100
  genetics, (283), 103; (284), 108
Gas laws again!, (284), 10
gas laws, (282), 120
gas volumes, (283), 120
genetics game, (283), 103; (284), 108
glimpse of key stage 5, A, (285), 45
GNVQ, (284), 33, 41
gradient of graph, (282), 119; (283), 125

Health and safety hearing, (283), 47
High-sensitivity electroscope, (285), 115
history of science, (282), 101; burning, (285), 31; education, (285), 49
How does the medium of instruction affect the learning of chemistry?, (283), 73
How fast can woodlice run?, (284), 105
How long is a chain? Reasoning in science, (285), 73
Hydroponics in the classroom, (284), 73

images in a plane mirror, (282), 90
impact and effect of key stage 3 science tests, The, (283), 79; (284), 99
indicators, (282), 62
Internet resources, (282), 55
interviews, (285), 79
investigation into the ease of flow of shampoo, An, (283), 121
investigation: animal behaviour, (285), 39
  chemistry, (285), 106
  forces, (285), 123
  physics, (284), 65
investigations, (282), 17; (285), 102
Is the Moon spherical?, (285), 119
Is it naive to expect school science books to be accurate?, (282), 23
It must be Tollens', (282), 120
It's something in the water!, (283), 37

key stage 1, (282), 17
key stage 3, (283), 79; (284), 99
kinetics, (284), 116
Kit for making models of DNA, (283), 114

Knowledge of earth science and the potential for its development, (283), 91

laboratory in school science, introduction of, (285), 49
language, (283), 73
Lavoisier, (283), 115
Learning and teaching about energy, power, current and voltage, (284), 89
Levitation in the magnetic field, (285), 116

magnetic field, (285), 116
malachite, (282), 67
Many substances but only five structures, (284), 79
materials, (284), 79
measurements of conductance, (285), 113
measuring enzyme activity, A simple and accurate method for, (285), 97
Measuring the refractive index of a transparent liquid, (284), 124
medical physics, (285), 123
Mendeleev, (285), 104
Miller-Urey experiment, (285), 106
model camera, A, (282), 85
modelling: current electricity, (282), 86
DNA, (282), 70
phytochrome, (282), 65
population dynamics on a spreadsheet, (283), 21
quantum mechanics, (283), 128
resonance, (283), 123
with spreadsheets, (283), 29
Modelling the early atmosphere – the Miller-Urey experiment, (285), 106
modern Periodic Table, A, (285), 104
Moon phases, (285), 119
Motivating students or teaching pure science? (285), 67
multiculturism, (283), 73

Nature, nurture and variation – spreadsheet investigations, (283), 108
nature study, (285), 102
Newton's second law, (283), 123; (284), 10, 127; (285), 12
non-uniform acceleration, (282), 120
Notes for contributors, (283), 10

Observations and investigations in nature study, (285), 102
Oh my elbow!, (285), 123
oil, (284), 57
Oxidation and reduction and Lavoisier, (283), 115
Oxidation and reduction now, (284), 112
ozone layer, (283), 57

pendulum, (285), 14
perfume chemical, Preparation of a, (284), 120
Periodic Table, (285), 104
photoelectric effect, (282), 79
phytochrome 'egg-timer', A, (282), 65
piezo-electric buzzer, (283), 122
Pitching textbooks at the right level, (283), 128
Practical alternatives, (285), 61
Practical assessment for advanced level, (284), 65
practical investigations for A-level, (285), 123
pressure law, The, (282), 120
primary science, (285), 73
primary-secondary links, (282), 9
problem solving, (283), 105
Problem-solving environmental science on the Chesapeake Bay, (284), 49
problem with differentiation, The, (284), 95
Promoting primary-secondary links in science during initial teaching training courses, (282), 9
pulse rate, (282), 63

quantitative analysis, (282), 73
quantum-mechanical dressing gown, The, (283), 128

radio signals, (283), 129
rain, (284), 121
RasMol, (283), 9
reaction rates, (283), 120
reasoning, (285), 73
recycling PET bottles, (282), 76
Red begonias – a new resource, (282), 62
redox, (283), 115
Reflections on plane mirrors, (282), 90
refractive index , (284), 124
renewable energy, (284), 29
resonance, (283), 123

Salters Advanced Chemistry, (283), 129
SATIS responds to new challenges, (283), 43
Save it for a rainy day, (284), 121
school science books, accuracy in, (282), 23; (283), 128
Science across Europe, (284), 23, 29, 33
'Science across Europe': monitoring the procedures and outcomes of an innovative project, (284), 23
Science teacher supply: attitudes of English and physics students to a career in teaching, (282), 109
Science teaching to fire the imagination, (285), 15
scientific approach to a bird-feeder problem, A, (283), 105
semiconductors, (283), 129
sequencing activity, (283), 99
Shaking houses, (283), 123
Shale: a rock of economic importance, (284), 57
'Simon's story' – the life of a sperm cell, (283), 99
simple harmonic motion, (284), 65
Socratic method, (284), 105
Solar cell problem, (283), 129; (285), 11
Solar cells in the school physics laboratory, (282), 79
sound, (283), 122
Sound and safety – citizenship and the National Curriculum, (283), 47
Speed-time graph for a falling mass, (282), 120
sperm, (283), 99
spreadsheet: investigation, (283), 108
modelling physical phenomena, (283), 29
modelling population dynamics, (283), 21; (284), 129
modelling titration, (285), 107
Spreadsheet simulations of physical phenomena, (283), 29
Standing waves and electrical changes with a piezo-electric buzzer, (283), 122
static electricity, (282), 81
Staying alive – a circulation game, (285), 100
strain gauge, (282), 87
strain gauge, Trials with a, (282), 49
Strains of music, (282), 87
structure of materials, (284), 79
Student understanding of ionic bonding, (285), 85
survey of the historical aspects of science in school textbooks, A, (282), 101
Swapping misconceptions, (285), 11
Synchronised stopclocks, (283), 129
Synthetic malachite, (282), 67

teacher training, (282), 115
teaching approaches, (285), 15, 23, 61, 67
Teaching current electricity by analogy with water flow, (282), 86
Teaching student teachers to teach science – those who can, do; those who understand, teach, (282), 115
textbooks, (282), 23; (283), 128
Theories of burning: a case study using a historical perspective, (285), 31
thermal conduction, children's conceptions, (282), 33
thermocouples, To introduce, (282), 83
titration, (285), 107
Titration curves: fact and fiction, (285), 107
Tollens' reagent, (282), 120

trehalose to stabilise rennin during desiccation, Preliminary observations on the use of, (282), 61
tuning fork, (282), 87

Using interviews to assess children's understanding of science concepts, (285), 79
Using Science across Europe as part of an Advanced GNVQ Science course, (284), 33

Van de Graaff generator, (283), 129
variation in human body, (283), 108
viscosity, (283), 121

water quality, (283), 37
wavelength, (284), 122
weight, (283), 127
Why we like PET bottles, (282), 76
woodlice, (284), 105

Author Index

Abdullah, A. (285), 79
Adkins, J. C. (284), 49
Alvarez, J. (282), 121
Auty, G. (282), 49, (282), 87; (284), 65; (285), 123

Baker, J. P. (285), 13
Beeley, M. (282), 115
